**African Mining Company**

# Cloud based ERP for African Mining Company

## OBJECTIVES

To implement an industry focussed cloud ERP platform to digitalize entire operations. Mining Industry has very specific processes and they needed a system which is 70% aligned with their processes and needed only 30% of configuration or customization.

## SOLUTIONS

We provided Infor ERP LN which has last mile features for a mining industry and can seamlessly adopt their business processes. Also it brings with it industry standard practices which adds value for the customer.

## BENEFITS

Because of Infor LN ERP's industry ready features, the implementation time was shortened by almost 30% and with an agile implementation methodology the customer started seeing ROI even before the final project sign-off. Additional benefits are reduction in operational cost, complete visibility of supply and demand and optimization of resource utilization.

Industry Focussed ERP Platform

Cloud Ready and Agile

Scalable to business growth
